

TURITEA NORTH

AT A GLANCE

- Located in the Tararua Ranges near Palmerston North in NZ's Manawatū region
- Largest wind farm in New Zealand expanding from both sides of the Turitea Reserve
- The northern zone comprises 33 wind turbines generating 120 MW, with an annual output of 470 GWh
- Involved ecologists during construction to minimise native vegetation & fauna impacts
- Mercury's Manawatū Community Fund supports community projects in this region

YOUR CONTRIBUTION

- Gets allocated to Mercury's new renewable electricity generation developments
- Supports large commercial and industrial businesses' decarbonisation goals
- Can be part of Mercury's strong pipeline of renewable development opportunities through long-term PPAs (Power Purchase Agreements) and/or Sleeving arrangements

YOUR BENEFITS

- Reduce your reportable electricity-related emissions
- Report zero Scope 2 GHG emissions
- Support Aotearoa New Zealand's renewable future
- Meet stakeholder expectations on climate change
- Make traceable, credible and verifiable claims
- Stand out in marketing and sustainability reports
- Align with international leading standards (subject to generation asset-age limit criteria)
